Pam, I don't think this will be a problem as long as the waste rock is clean and meets your standards regarding toxic or acid forming materials (this is a floodplain for a perennial stream) and there is adequate cover and topsoil to assure revegetation. Tom, if you have any concerns on this, please get back with Pam ASAP.

AM

Carter, they want to start this soon (9/15). This was already planned - but they will be using some waste rock instead of other fill. Here's the cover letter... If you have any problems, please let me know by Monday. Thanks.
